Medium	English
Year of Passing	2019
Grade	70-74.9%

Class X

Board	Maharashtra
Medium	Marathi
Year of Passing	2017
Grade	85-89.9%

PROJECTS

E-Shop, 2 Weeks

- E-Shop is a dynamic and user-friendly online shopping website built using the Django framework. Inside this project I developed nearly equal all features of online shop website.
- To build this I used technologies Django, little bit bootstrap. The project incorporates a custom user authentication system, allowing users to create accounts, log in, and log out securely.
- User registration involves capturing essential information such as username, email, and password.
- Passwords are securely hashed before being stored in the database to ensure data security. The website showcases a diverse range of products organized into

categories for efficient browsing.

- Each product is displayed with its image, name, description, price, and other relevant details. Users can add products to their virtual shopping carts, review cart contents, and proceed to checkout.
- To enhance security, the project implements measures such as input validation and protection against common web vulnerabilities like CSRF.

OTHER INTERESTS

- Reading Books
- Photography
